PROFILE

Backend-focused Computer Science (AI/ML) undergraduate with hands-on experience in building scalable web applications using Node.js, Express.js, MongoDB, and React. Developed full-stack systems, AI-based applications, and real-time monitoring solutions through academic and hackathon projects. Winner of a national-level hackathon (DefenceTech domain) with strong problem-solving and system-building skills. Seeking Backend or Full-Stack Software Engineering internship opportunities.

EDUCATION

- **Rai University, Ahmedabad** *Jul 2024 – Jun 2028*
B.Tech in Computer Science and Engineering (AI/ML)
Current CGPA: 9.43/10
- **Vidhya Niketan School, Rajasthan** *2024*
Higher Secondary Education (Class XII)
- **Govt. Sr. Secondary School, Rajasthan** *2022*
Secondary Education (Class X)

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, C
Frontend: React.js, Tailwind CSS, Redux Toolkit, HTML, CSS
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: MongoDB, MySQL
Tools: Git, GitHub, Postman, Figma
Concepts: JWT Authentication, API Development, Database Design, DevOps (Basics)

LakshyaAI *React, Python, BERT, NLP* [Live Link](#) — [GitHub Link](#)

- Built an AI-powered plagiarism detection system independently.
- Used pre-trained BERT model and TF-IDF for semantic similarity analysis.
- Developed a React-based frontend for document analysis and reporting.
- Focused on improving plagiarism detection accuracy through model tuning and testing.

WanderScape (Team Project) *Node.js, Express.js, MongoDB, JWT* [GitHub Link](#)

- Developed complete backend architecture for a travel planning platform in a 4-member team.
- Designed MongoDB schemas and implemented RESTful APIs for core application features.
- Integrated JWT-based authentication for secure user access and session handling.
- Followed modular backend structure for scalability and frontend integration.
- Managed deployment and version control using Git and GitHub workflows.

RakSha (Craftathon 2026 Winner) *React, FastAPI, AI/ML* [Hackathon Certificate](#) — [GitHub Link](#)

- Secured **1st Place in DefenceTech Domain** at Craftathon 2026 (36-hour hackathon).
- Built a real-time military communication anomaly detection system using AI-based logic.
- Developed both React frontend and FastAPI backend in a 4-member team.
- Implemented detection of simulated network threats including jamming and spoofing attacks.
- Delivered working prototype under strict time constraints with live demonstration.

KaushalX (Ongoing Project)

React, Python [GitHub Link](#)

- Developing a career recommendation system for job and future opportunity suggestions.
- Working on backend architecture and API development in a 5-member team.
- Contributing to identity verification workflow and system logic design.
- Supporting frontend integration for seamless user experience.

HardiBioCoal (First Client Project)

React, Node.js [GitHub Link](#)

- Developed a client-based web application as the first real-world project experience involving production-style requirements and delivery.
- Worked on both frontend and backend integration using React and Node.js to build functional user-facing features.
- Implemented backend APIs using Express.js for handling core application workflows and client requirements.
- Gained hands-on experience in client communication, requirement understanding, and real-world project structuring.

CERTIFICATIONS

- **AI/ML Virtual Internship**

Apr 2024 – Jun 2024

Completed AI/ML internship organized by Eduskills and AICTE with hands-on exposure to machine learning workflows.

[Certificate Here](#)

- **Cloud Computing (NPTEL - 12 Week Course)**

Apr 2026

Completed a 12-week NPTEL certification course in Cloud Computing covering core concepts of cloud architecture, virtualization, storage systems, and distributed computing.

[Certificate Here](#)

- **Prompt Engineering Workshop – Adani Group**

1 Day Workshop

Attended a hands-on workshop on Prompt Engineering covering fundamentals of LLM interactions, token-based input understanding, prompt structuring techniques, and introduction to Retrieval-Augmented Generation (RAG) concepts for improving AI response accuracy.

[Certificate Here](#)

ACHIEVEMENTS

- Completed 50+ JS exercises on [W3Schools](#).
- 1st place in Vedic Mathematics Quiz Competition at state level **Science Fair (Kota)**.
